

## Tea Boilers

Often found in school staff rooms and workplace kitchens, 'tea boilers' or storage water heaters, are wall-mounted containers provide hot water on demand. They are extremely convenient but can consume huge amounts of energy if they are left on all the time. To save energy and money, take control of your tea boiler with the **Chalmor MoveMaster**.

[MoveMaster](#) retrofits directly to your water heater. It combines a timer, to automate water heating with an occupancy sensor, to switch the heater on or off on a needs basis. This dramatically reduces the amount of energy used.

The following data was obtained from a monitoring exercise and summarises kWh consumption per week:

A typical week consumes 25.5kWh. Using the MoveMaster reduces consumption to 14.5kWh, a saving of 11kWh per week, or 43%. This will reduce electricity bills by upwards of £70 per boiler per annum, providing return on investment within a year and the potential for huge saving across a large estate.

A fully automated system, savings are made not only on weekends, but also during the week, when the office is busy, but not the tea boiler.

MoveMaster is quick and easy to install, low maintenance, extremely reliable and easy to replicate across your estate.

Call Chalmor today on 01582 748700 to see how much you can save with **MoveMaster**
