

## Season's Greetings from Chalmor

- [Salix Energy Efficiency Fund \(SEEF\)](#)
- [Chalmor has been successfully Re-Accredited as a Carbon Trust Approved Supplier](#)
- [Wonderful new lighting for MEADES ACCOUNTANTS](#)
- [10 good reasons to install eTRV+](#)

### Salix Energy Efficiency Fund (SEEF)

100% interest free capital funding for Academies, MATs and Sixth Form Colleges

Salix have developed a new fund in partnership with the Education Funding Agency (EFA) that focuses specifically on energy efficiency projects.

The Salix Energy Efficiency Fund (SEEF) is available for all academies, including those in large Multi-Academy Trusts (MATs) as well as sixth form colleges (SFC). The fund is directed to those academies and SFCs that have energy efficiency projects that need capital to invest to save but may not meet the Condition Improvement Fund's (CIF) condition need criteria. This could include projects such as lighting or heating controls, LED lighting, insulation or boiler/heating system upgrades.

You can apply for one SEEF bid per academy/SFC and this is in addition to the two CIF bids (for those eligible for CIF). The main criteria for this fund is that the projects must pay for themselves within 8 years through their annual energy savings. If you have a project that doesn't quite meet the 8 year payback but you have some capital to put towards it e.g. you don't need a CIF loan or CIF grant funding then you can still apply for SEEF.

**Application deadline: 3 PM, Friday, 13th January 2017**

## The Green Business Fund

*The Carbon Trust Green Business Fund is a brand new energy efficiency support service for small and medium-sized companies in England, Wales and Scotland. It provides direct funded support through energy assessments, training workshops, equipment procurement support and up to £10,000 capital contribution towards your energy saving equipment purchase.*

### Chalmor has been successfully Re-Accredited as a Carbon Trust Approved Supplier

ACCREDITED  
SUPPLIER

Carbon Trust Accredited Suppliers have been independently assessed by the Carbon Trust and met or exceeded criteria designed to examine their capability and proven track record of delivering thoughtful, well-designed energy efficient and renewable energy systems.

As part of the robust assessment process, the Carbon Trust takes into consideration a number of case studies, and feedback from client references regarding the suppliers' performance. The Carbon Trust Accredited Supplier scheme is the market-leading scheme for high quality energy efficient equipment and renewable technology suppliers.

It provides independent validation and recognition of a supplier's skills and services - a much needed and trusted quality standard in a crowded and fast growing market place. Accredited Suppliers must meet or exceed criteria set by the Carbon Trust designed to examine their capability to deliver thoughtful, well-designed energy efficient and renewable energy systems. Only Carbon Trust Accredited Suppliers are included in the Green Business Directory.

### Wonderful new lighting for MEADES ACCOUNTANTS

Meades are a very successful firm of accountants based in Watford. The lighting in the relatively modern 2 floor building had degraded and presented the ideal opportunity to upgrade with modern LED fittings. 70% energy savings were projected with energy efficient LEDs reducing the electrical load by 58%.

In addition to the new lighting Chalmor also supplied energy saving controls for lights and other appliances that were predicted to achieve a 29% reduction in running hours, minimising waste. In summary the new LEDs improved light levels, reduced maintenance and achieved an overall carbon saving of 6.15 tonnes of CO2 p.a.

Meades Director Louise Williamson described the new lighting as "wonderful" and commented that the office lights have a much warmer feel now and knowing that we are doing our bit to save the planet by reducing our energy consumption is an added bonus.

## Green Apple Presentation at the Houses of Parliament – Barrie picks up the award

### 10 good reasons to install eTRV+

eTRV+ from Chalmor is an award winning programmable electronic radiator valve that can be retrofitted directly to radiators, enabling automatic room by room heating control. It saves energy by heating only those rooms that you are using and by accurately controlling temperature to prevent overheating.

- Proven Savings of more than 30% with PAIR occupancy control - never heat an empty room
- Retrofit / Simple to install to upgrade existing TRVs
- Excellent Battery Life
- Peace of mind service from Chalmor
- Pay as you save "capital free" options
- Patented dual sensor close temperature control
- Tamperproof - secure settings feature and security collar option
- Behaviour changing and with Student awareness cards, eTRV gets everyone involved
- Qualifies for low rate VAT (Residential)
- Valve exercise routine to overcome sticking TRVs

**Do you have a heating or lighting project?  
Let us use our 30 years of sector experience  
to manage your next project from start to finish.**
